FERMENTATION TANK

DIVAIN

Create high-quality signature breads and baked goods

FRENCH BAKERY
EQUIPMENT MANUFACTURER

SINCE 1922

With the **DIVAIN** sourdough fermentation tank, you can mix, ferment and preserve your own liquid leaven. The preservation mode maintains the leaven for up to 72 hours without any need for refreshing. Leaven – a natural leavening agent made from just flour and water – enhances flavour, gives a more open crumb, and helps baked products stay fresh for longer.

DIVAIN guarantees a **constant, consistent supply of liquid leaven** so you can create **unique breads and baked goods**.

Liquid leaven can be used in all kinds of bakery products, including speciality loaves, white bread, brioches and pastries.

Robust
Cost-effective

A fermentation tank that's easy to use

Thanks to the intuitive touchscreen control panel, preparing and preserving liquid leaven is very straightforward. The Programming mode allows you to save 3 different cycles to preserve leaven for up to **72 hours**, so you can close the bakery for a few days and still have leaven ready to use .
You can change the rotation speed of the mixing tool as often as required to suit different techniques and recipes.

A fermentation tank you can rely on 24/7

DIVAIN takes the guesswork out of managing your supply of leaven. Thanks to an **infrared sensor***, you can **see exactly how much leaven is left** at all times and make sure you **keep enough starter for refreshing** and use in subsequent batches.

A fermentation tank that requires minimum maintenance

For optimum hygiene, **the tank is made from stainless steel** and the mixing tool (scraper + stirrer) and dispensing valve can be **removed without tools** for easy cleaning.

Tips from our bakers

For best results when refreshing, we recommend that you keep at least 20% of the leaven for the next starter.

* Unavailable on **DIVAIN 15**

Simple process, delicious results

A fermentation tank designed with users in mind

Quiet
Noise level < 70 dBA

Safe

The lid is held open by soft-closing lid supports, and an automatic cut-off device stops the machine when the lid is opened

Durable and robust

Stainless steel tank and structure, and protected sensors for leaven and tank temperature

Easy to clean

Removable stainless steel dispensing valve

Easy to manoeuvre

2 stainless steel handles and 4 castors (2 with brakes)

Easy to install

All models except the **DIVAIN 320** are plug-and-play

Work in complete safety with DIVAIN

Our commitment to safety goes beyond self-certification since we have our equipment audited by an independent external body.

Our experts at your service

Sales expertise

Our sales and installation teams can help you decide on the best equipment and layout for your production process and offer support at every stage of your project.

For the French market, we also offer financial leasing solutions through a dedicated division, Bongard Finance. This agile financing method preserves cash flow and is a first in the bakery and pastry goods market.

Business expertise

At our head office in Holtzheim, France, we have a 320 m² showroom and laboratory where you can come and try out our equipment in line with your own production processes. Contact us to arrange a visit.

Wherever you are in the world, we can arrange for our master bakers to visit your premises and train you on our machines.

Technical expertise

Our equipment is covered by the manufacturer's warranty from the moment of delivery. To optimise the service life of your equipment and avoid costly downtime, you can also take out a maintenance contract and/or an extended guarantee.

The technicians at our dealerships and distributors receive regular training so they are fully qualified to keep your equipment in good working order.

Our dealers and distributors have access to an online platform where they can consult technical documentation and order spares from a catalogue of around 5000 original parts, which ship within 24 to 48 hours.
